A Grade Teak
Solution Dyed Acrylic Fabric
Contact Devon for fabric colour options

TEAK is a durable hardwood timber that's been used for boat building and furniture making for centuries, thanks to its strength and longevity. Teak will survive many years outdoors with little or no structural deterioration thanks to its highly water-resistant quality and natural oils. We carefully select A Grade Teak.

SOLUTION DYED ACRYLIC FABRIC is a durable, high-performance synthetic fabric made by adding coloured dye to the acrylic fibers. This makes it one of the most fade resistant fabrics, ideal for harsh UV rays. It's also mildew resistant, highly durable, and soft to touch.

QUICKDRY RETICULATED FOAM is used for our cushion inners. This foam has large pores to allow water to drain quickly and air to circulate, ensuring it maintains its shape and comfort despite the elements.
